Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 November 2006.
 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-6, 13, 29-32, 34, 35, 37, 38, 40, 46, 53-55 and 89-92 is/are pending in the application.
 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
 5) ☐ Claim(s) _____ is/are allowed.
 6) ☒ Claim(s) 1-6, 13, 29-32, 34, 35, 37, 38, 40, 46, 53-55 and 89-92 is/are rejected.
 7) ☐ Claim(s) _____ is/are objected to.
 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 a) ☒ All b) ☐ Some * c) ☐ None of:
 1. ☒ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

DETAILED ACTION

1. This office action is responsive to the amendment filed on 11/27/2006.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-6, 13, 30, 31, 46, 53-55, 89-92 are rejected under 35 U.S.C. 102(b) as being anticipated by Raspotnik (US Patent 5,832,090).

Raspotnik discloses, in figures 1 and 2, a RFID system comprising a RFID tag module 11 having an electronic identification circuit 12, a coupling means or antenna 16, an antenna structure 17 coupled to the coupling means, wherein the RFID tag module is separate from the antenna structure, and a communication means or a further electronic identification circuit or reader 14 attached to the antenna structure 17.

4. Claims 1-6, 13, 30, 31, 34, 35, 37, 38, 40, 46, 53-55, and 89-92 are rejected under 35 U.S.C. 102(e) as being anticipated by Tuttle et al (US patent 6,466,131).

Tuttle et al disclose, in figures 1-3, a RF data communication device comprising an object 20 having a RFID tag module 12', wherein the tag module comprises an electronic identification circuit 16, a coupling means or antenna 22, an antenna structure

Art Unit: 2821

28 coupled to the coupling means 22, wherein the RFID module is separate from the antenna structure 28, and wherein the RFID module communicates with first and second communication means 27 and 29. The patent to Tuttle et al also teaches that the interrogator/transponder or RFID system 24 is used for a large number of uniquely identifiable tags, see column 5, lines 19-33.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 29 and 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tuttle et al.

The patent to Tuttle et al, described above, differs from the claimed invention because it does not disclose the electrically dimension of the antenna structure in claim 29, and the distance when the tag is coupled to the antenna structure are considered an obvious matter of design choice depending on the desired characteristic of the RFID system.

Response to Arguments

7. Applicant's arguments filed 11/27/2006 have been fully considered but they are not persuasive. The applicants assert that the patent to Raspotnik does not teach the RFID tag module separated in non-contacting coupled arrangement with or separable the antenna structure. In the office action, the Examiner explain that the RFID module is

Art Unit: 2821

separate from the antenna structure 17, not antenna 16 as that argue by applicants.

The antenna 16 is a coupling means which is satisfied the antenna connected to or integral with RFID module as that defined in claim 2 by applicants. Similarly, the patent to Tuttle et al does teach the RFID tag module 20 separated in non-contacting coupled arrangement with or separable the antenna structure 28, not antenna 22.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
